FORESIGHT

YOUR GATE TO SUCCESS

INTRODUCTION

- Basis why Foresight was created :

  - It is common between students to search for information
    on the internet. But it's not that easy to acquire the
    correct info they are looking for due to the huge amount
    of websites on the internet . And that takes plenty of time to
    check the validity of the info and what source it came from ,Is it trusted ?
    Is it correct ? .
    You need as a student to ask these question before you take that info

INTRODUCTION CONT.

Mostly info comes in the form of a course and there are many websites such as Udemy which offers a huge amount of courses presented by different people .The only problem that what they offer is not validated by anyone and you probably have to purchase the course , which is not always a valid option for students. That's why we developed **Foresight** . To gather the only trusted and most validated info found on the internet .

OUR VISION

OUR VISION

We share knowledge with the world

Whether you want to learn or to share what you know, you've come to the right place. As a global destination for online learning, we connect people through knowledge.

THE WEBSITE

LOGIN-CREATE ACCOUNT

LOGIN-CREATE ACCOUNT

The login page is modernly designed to be user-friendly and easy to use . The space in which it was created was well-used and made to fit the "create account" section in the same page to not confuse the user with multiple pages .

If the user wants to login with Facebook or google, the option is there for them to use.

It is accompanied with "forget your password" just in case the user forgot the password to their account .

LOGIN-CREATE ACCOUNT

We used Firebase to be fully responsible of the authentication part . And it also fully manages users, how they enter the website , create account and their favorites.

NAVIGATION BAR / FOOTER

NAVIGATION BAR / FOOTER

You can use the navigation bar and the footer to navigate through the website with ease and to display some info related to the user.

Also the navigation bar is responsive to whether the user is signed in or not .

PROFILE PAGE

PROFILE PAGE

This page will enable users to change their info after they created an account . They can customize their info as they like.

ABOUT US PAGE

ABOUT US PAGE

This page displays what the developers wanted to achieve with their work, who they wanted to benefit and what are their future plans .
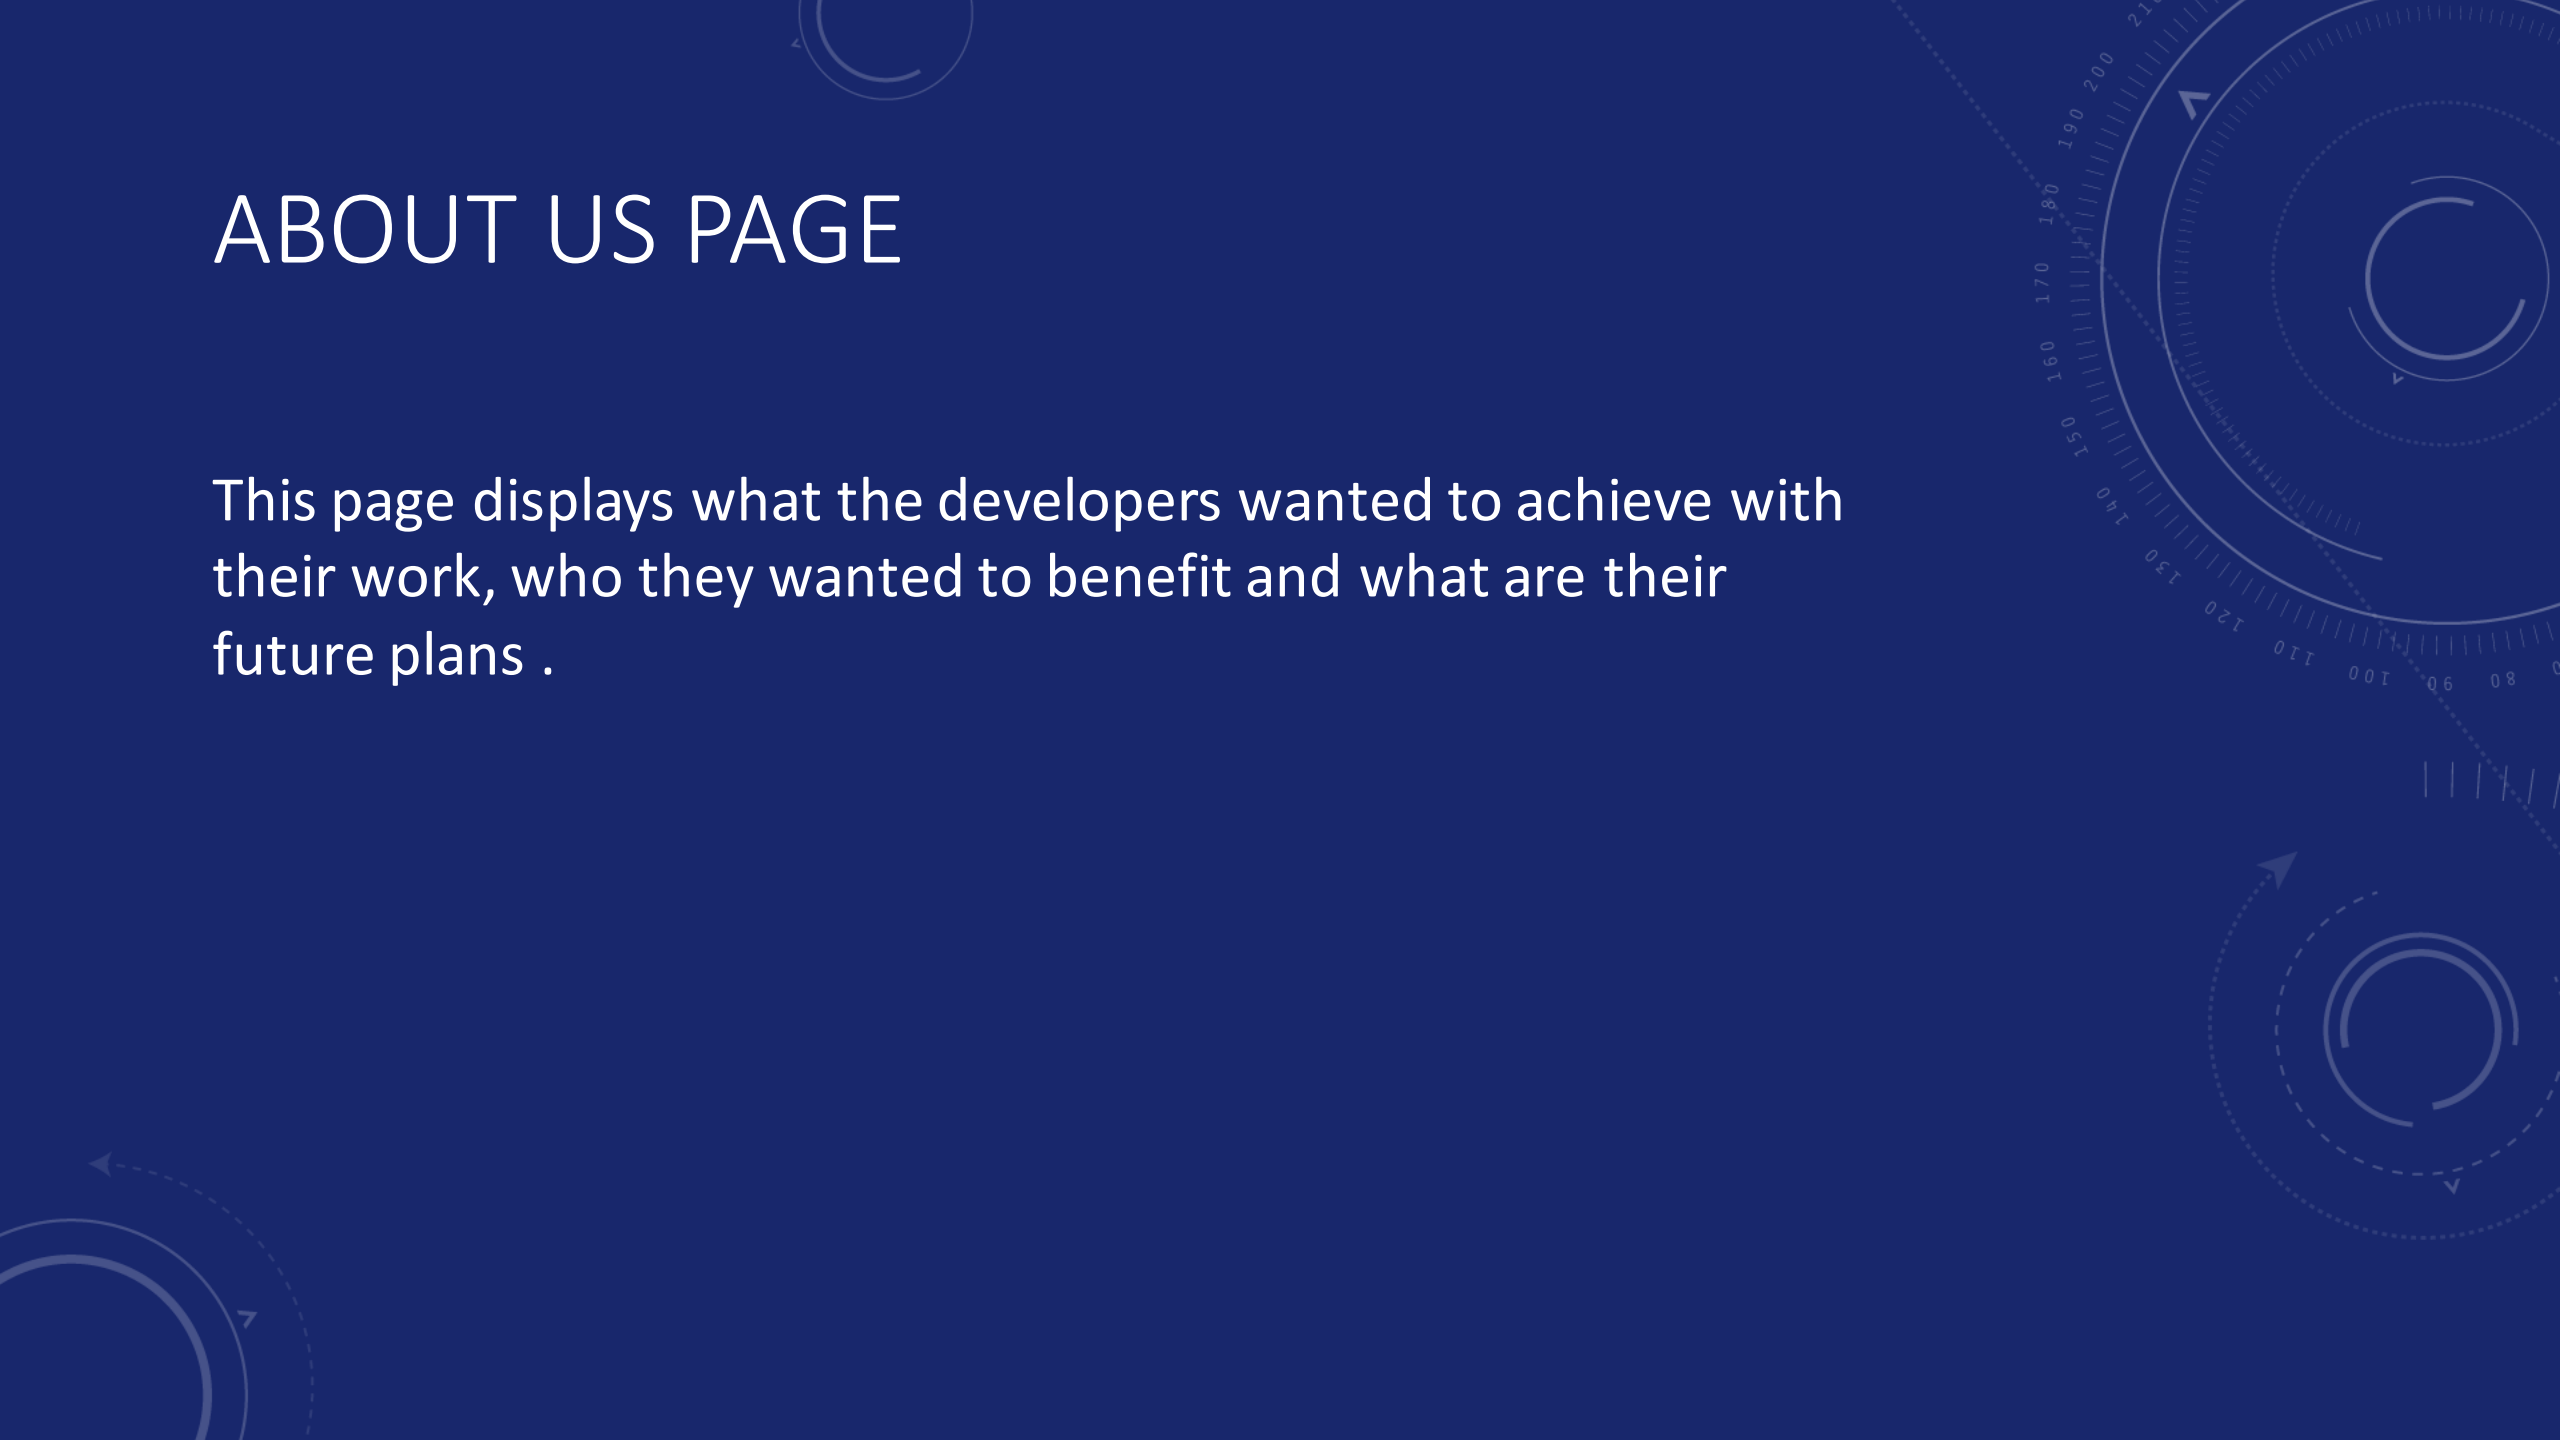

TECHNOLOGIES USED

TECHNOLOGIES USED

We used a lot of different technologies such as :

-Design : Figma, AdobeXD, Photoshop.

- Front-end : HTML , CSS, JavaScript , bootstrap, jQuery, SASS.

- Animations: lottiefiles.

- Back end : Firebase JS.

CONCLUSION

CONCLUSION

In the end we would like to thank the committee for their time.

And a special thanks to Dr.Hamzah AlDabbas for his continuous support throughout the duration of the project . And all the teaching staff who taught us everything we need in our college life.

And big appreciation for Dean of the College of Prince Abdullah bin Ghazi Dr. Khalaf Khtattenh .
